

FOR IMMEDIATE RELEASE

SmartSearch Adds Newly Enhanced Dashboard, Record And Report Views To Version 19 Upgrade

SmartSearch ATS latest version includes streamlined, graphical user-interface and interactive dashboard.

OCEANSIDE, CA June 30, 2016 – Advanced Personnel Systems, Inc. (APS), the makers of SmartSearch®, publishes the second in its series of three press releases describing their Version 19 ATS. SmartSearch now offers a newly improved, highly functional user interface that sports an enhanced dashboard, enhanced record look-up, a better mini-view, an upgraded organizational chart, and easier access to folder functionality.

“Version 19 offers robust and time-saving changes to sourcing with the new semantic search capabilities within the software. Version 19 demonstrates that SmartSearch is focused on the cadence of surpassing their competitors. This release is a game-changer for our organization,” states Nicole Laichak-Mack, Director of Recruiting, MMC Group.

With inspiration drawn from SmartSearch clients, the newly enhanced features of the dashboard, records and report views were designed to help clients compete and succeed with more ease within their competitive business markets.

“We listened to our customers’ feedback and responded by creating a dramatically improved interface. The flexibility and graphical design of the new dashboard has greatly improved the speed, efficiency, view-ability and user access to critical information. The feedback we’re receiving on Version 19 has been very positive and enthusiastic to say the least and we couldn’t be happier about this,” adds Doug Coull, CEO, APS, Inc.

The new, configurable graphical dashboard provides streamlined access to charts and graphs with innovative click-thru navigation capabilities, which allows users to drill down from graphs to more detailed information. Additionally, as part of the Version 19 upgrade, a variety of recruiting and sales activity reports are now available as graphs on the dashboard. The mini-view has been improved to provide more flexible, configurable access to information while viewing primary records and with a wider range of available data. For record look-ups, new capabilities have been added to improve speed and efficiency while retrieving a variety of record types. Improvements to the org chart functionality in business records allows for better, easier access for sales and relationship management with enhanced drill-down information capabilities. The final interface improvement has been to the folders. The ability to access multiple folders at once and to toggle between searching one’s own folders, their branch or all folders, has been added to provide flexibility, along with greater ease and speed.

“Version 19 was a labor of love for us. With client input and inspiration, we were able to build and deliver a highly responsive and visually appealing product, which our clients are excited to use,” says LJ Morris, CTO, APS, Inc.

Version 19 offers many new and enhanced functions in addition to the efficient and user-friendly dashboard, enhanced reports and records, and lightning-fast search engine. SmartSearch users will find Version 19 boasts of an updated and efficient two-way texting option, Google Calendar integration and support for Gmail users, and an improved mobile-friendly Onboarding Portal. In addition, new tools to upload resumes

quickly with a drag-and-drop feature or Dropbox upload have been added, in addition to an enhanced feature for using LinkedIn imports with the Smart Page Capture.
